The following guiding principles are to be adhered to in order to facilitate the administration of Council's investment portfolio.

5.1 Limit exposure to a single institution

5.1.1

Investment of funds, where this involves large amounts above R 50m, should be distributed over more than one Institution in order to limit Council's risk exposure.

5.1.2

It is considered prudent that not more than 35% of Council's investment portfolio should be held with any specific Institution identified as one of the five largest banking institutions in South Africa, at any given time.

With regard to other banking institutions, not more than 20% of Council's investment portfolio should be held at such institutions at any given time.

5.2 Risk and Return

As a general principle, it must be accepted that the greater the return, the greater the possible risk.

5.3 Borrowing for Re-Investment

Council should refrain from borrowing monies for the purpose of re-investment, as this is tantamount to speculation with public funds.

5.4 Nominee Accounts

All monies shall be invested directly with the relevant institutions. No moneys may be placed in a nominee account.

5.5 Registered Financial Institutions

When investments are made with Financial Institutions, Council should ensure that the Institution is registered in terms of the Deposit Taking Institutions Act of 1990 and/or other applicable legislation.

6. General Investment Practice

6.1 General

Should it be ascertained that funds are available for investment, then written quotations including faxed quotations should be obtained from financial institutions for various forms of investment, investment terms and rates of interest.

The investment shall be placed with an institution offering the most favourable rate provided in such investment is in accordance with the terms and conditions of this policy.

Institutions should be advised that, in submitting quotations, they must offer their best rates of interest and that no further negotiation or discussion will be entered into with them after they have submitted their quotation.

6.1.1 Payment of Commission

A certificate shall be issued in respect of each and every investment and no payment of any commission or payment in kind will be made to any party in respect of the investment so made.

6.1.2 External Investments

Before planning to use funds externally, consideration must be given to whether the funds may be utilized at an equivalent rate to substitute external borrowing as there is normally a margin between the rate at which Council may borrow funds and the rate at which investments may be made over similar periods.

6.1.3 Cash at Bank

When funds are held in a current account, it is a good business practice to operate a call account. The overriding principle is that funds in the current account are to be kept at an absolute minimum.

6.1.4 Credit Worthiness

Prior to investing in registered financial institutions, the Investment Committee must ensure that the Council is not over-exposed and should satisfy itself as to the credit-worthiness and previous track record of the Institution before placing funds.

In order to reduce risks in this regard, Investments must only be made with financial institutions with a shareholder's equity of at least R750m and with an office within the

Council's area of jurisdiction. The shareholder's equity figure must be obtained from the latest available financial statements of the relevant financial institution.

7. Control over Investments

A proper record must be maintained of all investments made indicating at least the Institution, fund, interest rate, maturing date and purpose of investment.

The Chief Financial Officer (CFO) must retain all quotations received for record and audit purposes.

Interest must be correctly calculated, received and recorded timeously.

All investment certificates are to be kept in a securities file which shall be safeguarded in a fire proof safe.

In respect of grant funds, a separate file must be kept of the letter of grant and other pertinent information. Regular reports must be submitted to all grant agencies.

The Chief Financial Officer (CFO) must compile and will be responsible for the maintenance of an Investment Register complying with audit requirements.

Internal control over investment function
